

Worm parts

We manufacture screw elements, throttle rings and throttle rings of any size and dimension for screw presses of all well-known screw press suppliers.

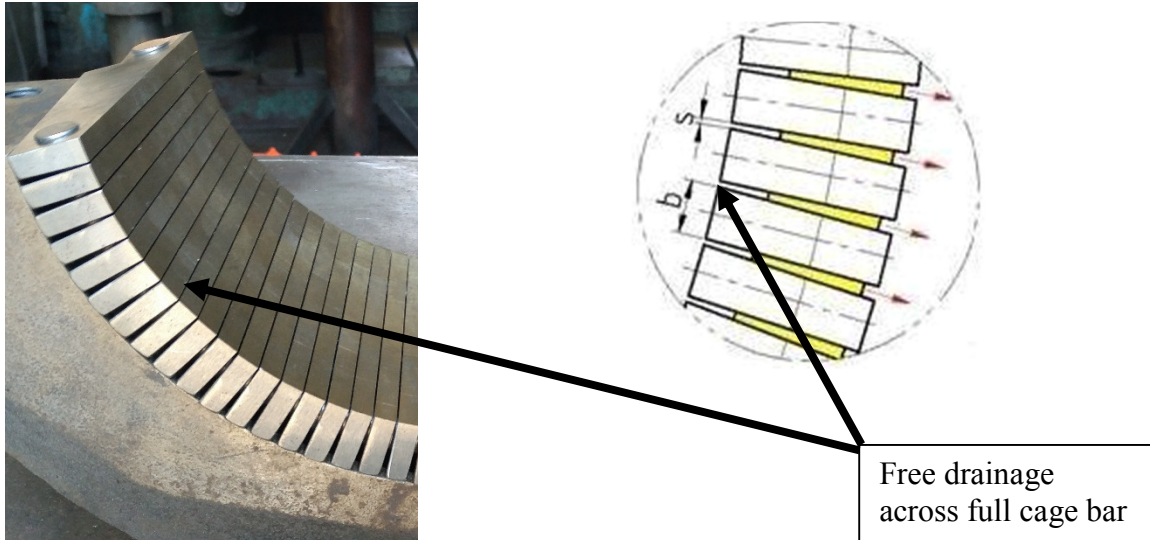

- Milled from one work piece
- Multiple layer hard facing of screw elements and rings on the on process side
- Grinded and polished final surface
- Groove on face side for placing in sealing rings
- Threated hole on face side for fixing of pull-off devices specifically for big and heavy parts on demand

Cage lining

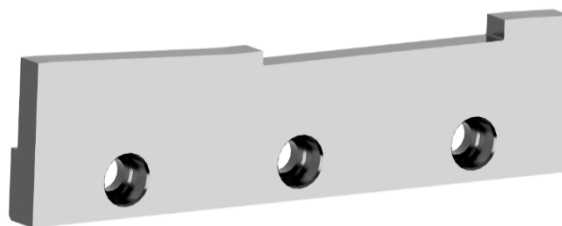

We manufacture cage bars, scraper and clamping bars of any size and dimension for screw presses of all well-known screw press suppliers. Cage bars of common dimension are available ex stock.

Cage bars and clamping bars

- Hard facing of cage bars and clamping bars on the process side
- Thus highly wear and tear resistant
- Integrated spacer with widened space within the rear range
- Increase of drainage surface by about 20%
- Simplified and time saving mounting
- Most firm positioning of the cage bars

Scraper

- Manufactured from highly wear resistant so called alloyed tool-steel
- Hardened and tempered under vacuum
- Thus highly wear and tear resistant
- Resulting in increased availability of the screw presses
